

Much excitement at the MBA executive meeting this month. The much awaited Urban Renewal Plans first phase is being put in motion.

The Municipality has received funds to start with paved walkways along the Beachfront from the fishing pier to Finnis road in the South.

Additional parking, along the way and at the Finnis road/dirt road junction is to be created as well.

The viewing deck alongside the pier is to be upgraded and most exciting is the planned repair to the Tidal pool. These will also have improved access created.

This all to take place between now and the end of May next year.

Such good news for Margate.
